**Report Summary:**

The ICS is a significant outlier in terms of two key cancer outcome metrics: low one year survival rates and % of cancers diagnosed at an early stage (1&2).

The ICS Cancer Strategy is implementing a number of initiatives centred around earlier diagnosis, in particular lung and colorectal cancer. The attached presentation focuses on patients stories related to implementation of a targeted lung MOT programme within Nottingham City (to be expanded to Mansfield and Ashfield in 2019/20), and implementation of a new colorectal cancer test in primary care (FIT - faecal immunochemical test).
